## MARKETABLE PHOSPHATE ROCK IN JANUARY 2003

U.S. marketable phosphate rock production in January 2003 increased 3% from the prior month, according to the U.S. Geological Survey (USGS). Annualized production for the month was 34 million metric tons (Mt), which was about 4% lower than in 2002.

Domestic phosphate rock sold or used for January increased slightly from the prior month, to about 2.85 Mt. Annualized sales or use for the month was 34 Mt, which was about 4% lower than in 2002. U.S producer ending stocks for January increased slightly from those of December 2002.

Some phosphate rock import data for Morocco were suppressed by the U.S. Census Bureau. U.S. import tonnage was estimated by USGS to average 225,000 tons per month.

January import data were not available at the time of publication. Annualized domestic consumption for 2003 is estimated to be 36 Mt, using annualized sales and use data and estimated trade data. Apparent domestic consumption for 2002 calculated from the sum of home deliveries and adjusted trade data was 37.5 Mt.
